Always wear recommended personal protective equipment. Limit foot and vehicular traffic to minimize mechanical agitation and dispersion. The spill should first be contained and the area should be cleaned by wet-sweeping or vacuum cleaning (HEPA filter). Notify In-plant Spill Response Coordinator or appropriate party to determine any additional requirements pertaining to spill response.

CONTAINMENT TECHNIQUES: This is a solid material and will not travel far from the spill location unless mechanically agitated. Therefore, no specific containment techniques are recommended outside of restricting access to the spill location.

SPILL RESPONSE EQUIPMENT:

- Vacuum, equipped with HEPA filter
- Dustpan, shovel or scoop
- Broom, wet mop
- Bags, drums or sacks for collection

SPILL RESPONSE PERSONAL PROTECTIVE EQUIPMENT:

- Rubber or leather gloves
- Cotton overalls
- Chemical/safety impact goggles
- If airborne concentrations cannot be controlled below the required or recommended exposure limits, respiratory equipment, as per Section 8.0, may be required.

Section 7 HANDLING AND STORAGE

HANDLING:

Always wear recommended personal protective equipment. Avoid dust generation.

STORAGE:

Store in a cool, dry, well-ventilated area away from sources of ignition. Keep containers tightly closed when not in use.

Use care when handling and storing containers to prevent damage.

Section 8 EXPOSURE CONTROLS/PERSONAL PROTECTION

ENGINEERING CONTROLS: General mechanical ventilation is acceptable, as long as concentrations are maintained below required/recommended limits. Where acceptable concentrations cannot be maintained by general mechanical ventilation, local exhaust ventilation is recommended.

RESPIRATORY PROTECTION EQUIPMENT: NIOSH/MSHA approved respiratory protection is recommended for use in airborne concentrations exceeding exposure limits identified in section 2. Where no required/recommended exposure limits exist, personal protection measures should be incorporated when potential airborne concentrations may exceed 10 mg/m³ total dust and 3 mg/m³ respirable dust (particulate containing no asbestos and <1% crystalline silica).

PROTECTIVE GLOVES: Rubber or leather gloves and cotton coveralls are recommended to prevent direct skin contact.

EYE AND FACE PROTECTION: Wear safety glasses or goggles to protect against exposure.

OTHER PROTECTIVE EQUIPMENT: An emergency eye wash is recommended in the work area and
