Jinshi Humic Acid powder/granule

WHAT IS HUMIC/FULVIC ACID?

HUMIC ACID powder or granular form of lignite/leonardite,it's basic raw material for manufacturers in agricultural and industrial products,Humic/Fulvic acid and other humic substances, collectively referred to as humates, are the final stage of organic matter as it degrades to its smallest possible size. They are extremely complex molecules, formed naturally over time by soil microorganisms as they recycle the nutrients and organic matter present in decaying plant material. In healthy, pristine soils, humates are constantly formed by the life and death cycles of plant roots, microorganisms, and fungi in the soil. Modern agricultural practices have disrupted this cycle in order to maintain good soil health, it is now necessary to add this critical component back into the soil, so that we can reap the benefits of working with instead of against nature.

Specification:

Humic Acid Powder

HAY HA-001

HA(dry basis):60%min,
Moisture:30%max,
PH:4-6,
screen:80-160mesh
Appearance: powder

Humic Acid Granular

HAY HA-002

HA(dry basis):50%min,
Moisture:30%max,
PH:4-6,
size:2-4mm
Appearance: granular

Humic acid

HUMIC ACID Benefits

For plant

- Plant growth stimulant, promote root development and stimulate seed germination
- Enhance nutrient uptake by combining nutrients and humic acid and keep a well-balanced nutrition.
- Enhance the resilience of crops, such as cold, drought, pest, disease and toppling resistance.
- Promote healthier, stronger plants and enhance appearance

For Soil

- ◆ Soil conditioner, improve soil structure, increase ion exchange capacity of soil.
- ◆ Enhance resistance to stress for soil, especially reduce high salts in alkaline soils
- ◆ Enhance nutrients uptake and increase the content of humus in soil
- ◆ Prevent soil from contamination of heavy metallic ions as well as other harmful matters
- ◆ Fertilizer efficiency promoter. Greatly improve the utilization of N&P

Humus Package &Transportation:

- 25kg/pack ,common plastic woven bag
- 25kg/kraft bag with PE lining
- Or as customer requirement

Gansu Jinshi Group Introduction:

- ◆• Have our own high-quality XinJiang coal resources.
- ◆•Mature production skills and rich product knowledge.
- ◆•As a factory, quality guaranteed and we have trade assurance with Alibaba.
- ◆• More competitive price without sacrificing quality in the international market.
- ◆• Professional after-sales service and 24 hours service.
- ◆•Free samples available if you need test.
- ◆• Flexible MOQ, Diverse forms of payment, Fast delivery
